Reducing the Vulnerability of Albania's Agricultural Systems to Climate Change: Impact Assessment and Adaptation Options (World Bank Studies) William R. Sutton, Jitendra P. Srivastava, James E. Neumann, Kenneth M. Strzepek, Peter Droogers

Agriculture is one of the most climate-sensitive of all economic sectors. In many countries, such as in Albania, the risks of climate change are an immediate and fundamental problem because the majority of the rural population depends either directly or indirectly on agriculture for their livelihoods. The risks of climate change to agriculture in Albania cannot be effectively dealt with and the opportunities cannot be effectively exploited without a clear plan for aligning agricultural policies with climate change, developing the capabilities of key agricultural institutions, and making needed investments in infrastructure, support services and on-farm improvements. Developing such a plan ideally involves a combination of high-quality quantitative analysis, consultation with key stakeholders, particularly farmers and local agricultural experts, and investments in both human and physical capital. The experience of Albania, highlighted in this work, shows that it is possible to develop a plan to meet these objectives—one that is comprehensive and empirically driven as well as consultative and quick to develop. The approach of this study is predicated on strong country ownership and participation, and is defined by its emphasis on “win-win” or “no regrets” solutions to the multiple challenges posed by climate change for farmers in Albania. The solutions are measures that increase resilience to future climate change, boost current productivity despite the greater climate variability already occurring, and limit greenhouse gas emissions. *Reducing The Vulnerability of Albania's Agricultural Systems to Climate Change: Impact Assessment and Adaptation Options* applies this approach to Albania with the goal of helping the country mainstream climate change adaptation into its agricultural policies, programs, and investments. The study projects impacts of climate change on agriculture across Albania’s three agro-ecological areas through forecast variations in temperature and rainfall patterns so crucial to farming. It offers a map for navigating the risks and realizing the opportunities, outlined through a series of consultations with local farmers. A detailed explanation of the approach is provided for those who would like to implement similar programs in other countries of Europe, Central Asia, or anywhere else in the world. This is one of four country studies that were produced under the World Bank’s program, “Reducing Vulnerability to Climate Change in European and Central Asian Agricultural Systems”. The other countries included in this series are FYR Macedonia, Moldova, and Uzbekistan. The results from the four studies are consolidated in the book *Looking Beyond the Horizon: How Climate Change Impacts and Adaptation Responses Will Reshape Agriculture in Eastern Europe and Central Asia* website.

From reader reviews:

Leon Moses:

This Reducing the Vulnerability of Albania's Agricultural Systems to Climate Change: Impact Assessment and Adaptation Options (World Bank Studies) book is not ordinary book, you have after that it the world is in your hands. The benefit you receive by reading this book is information inside this e-book incredible fresh, you will get facts which is getting deeper an individual read a lot of information you will get. This Reducing the Vulnerability of Albania's Agricultural Systems to Climate Change: Impact Assessment and Adaptation Options (World Bank Studies) without we realize teach the one who examining it become critical in pondering and analyzing. Don't become worry Reducing the Vulnerability of Albania's Agricultural Systems to Climate Change: Impact Assessment and Adaptation Options (World Bank Studies) can bring once you are and not make your tote space or bookshelves' grow to be full because you can have it inside your lovely laptop even telephone. This Reducing the Vulnerability of Albania's Agricultural Systems to Climate Change: Impact Assessment and Adaptation Options (World Bank Studies) having fine arrangement in word and layout, so you will not sense uninterested in reading.

Meredith Daugherty:

As people who live in often the modest era should be update about what going on or information even knowledge to make all of them keep up with the era that is certainly always change and move ahead. Some of you maybe may update themselves by reading books. It is a good choice for yourself but the problems coming to you is you don't know what one you should start with. This Reducing the Vulnerability of Albania's Agricultural Systems to Climate Change: Impact Assessment and Adaptation Options (World Bank Studies) is our recommendation to make you keep up with the world. Why, since this book serves what you want and want in this era.

Melvin Groth:

Do you certainly one of people who can't read satisfying if the sentence chained inside the straightway, hold on guys this aren't like that. This Reducing the Vulnerability of Albania's Agricultural Systems to Climate Change: Impact Assessment and Adaptation Options (World Bank Studies) book is readable simply by you who hate those perfect word style. You will find the information here are arrange for enjoyable studying experience without leaving also decrease the knowledge that want to supply to you. The writer of Reducing the Vulnerability of Albania's Agricultural Systems to Climate Change: Impact Assessment and Adaptation Options (World Bank Studies) content conveys thinking easily to understand by most people. The printed and e-book are not different in the information but it just different by means of it. So , do you nonetheless thinking Reducing the Vulnerability of Albania's Agricultural Systems to Climate Change: Impact Assessment and Adaptation Options (World Bank Studies) is not loveable to be your top listing reading book?

Charles Gray:

You are able to spend your free time you just read this book this guide. This Reducing the Vulnerability of Albania's Agricultural Systems to Climate Change: Impact Assessment and Adaptation Options (World Bank Studies) is simple to create you can read it in the park your car, in the beach, train and soon. If you did not include much space to bring the printed book, you can buy the actual e-book. It is make you simpler to read it. You can save the particular book in your smart phone. Thus there are a lot of benefits that you will get when you buy this book.
