- Installation methods of drainage and storm water management facilities

Urbanization has had a drastic impact on the natural process of storm water runoff; increasing both the peak and the volume of runoff, reducing infiltration, while also degrading water quality. **Urban Storm Water Management** is a compendium of all matters necessary for the design of efficient drainage and storm water management systems. It includes numerous examples of hydrologic and hydraulic calculations involved in this field. It also contains ample case studies that exemplify the methods and procedures for the design of extended detention basins, infiltration basins, and underground retention/infiltration basins such as chambers and dry wells.
