Learn the 2 Myths, the 6 Mental Blocks, the 2 Keys to building wealth and the 3 Bucket Process - none of which they taught you in school.

This book fills a serious gap in the education system. No matter where in the world you live or where you were educated, the education system has not given you the tools to prosper as an individual. When you look at the numbers, US Median Household Income hasn't changed since the mid-1970s. In fact, it's worse if you look closely – back in the 1970s only one parent had a job. Today, most moms have jobs. In other words: Today it takes two parents to make roughly the same amount of household income that only one parent earned back in the '70s. This means, we're not making progress. We're going backwards. A college education cannot stop this trend... It's less likely that your income will grow by just relying on a job. And even if you're making a reasonably good income today, chances are your retirement is in jeopardy. The education system has not taught any of us how to manage our own money. There's only one path to prosperity – and the education system isn't it. College and high school don't give you the knowledge you need to manage your money such that you can afford your children's education and a comfortable retirement. The Education System is not designed to do that. The school system has failed us all – but this book will help you understand the dynamics of wealth creation, no matter how old you are. It's never too late to take control of your money and maximize your chances at prosperity. This book is easy to read - you're going to have a very different view on life after you've read it. D.S.
