Practice Arithmetic and Number Theory: Level 3 (ages 11-13) (Competitive Mathematics for Gifted Students) (Volume 10) Cleo Borac, Silviu Borac

About “Competitive Mathematics for Gifted Students” This series provides practice materials and short theory reminders for students who aim to excel at problem solving. Material is introduced in a structured manner: each new concept is followed by a problem set that explores the content in detail. Each book ends with a problem set that reviews both concepts presented in the current volume and related topics from previous volumes. The series forms a learning continuum that explores strategies specific to competitive mathematics in depth and breadth. Full solutions explain both reasoning and execution. Often, several solutions are contrasted. The problem selection emphasizes comprehension, critical thinking, observation, and avoiding repetitive and mechanical procedures. Ready to participate in a math competition such as AMC-8, AMC-10, Math Kangaroo in USA, Math Leagues, USAMTS, or AIME? This series will open the doors to consistent performance.

About Level 3 This level of the series is designed for students who can solve linear equations, are fluent with fractions, and can factor into primes. The problem sets are designed to strengthen specific areas where we know students have difficulty on AMC-8 and AMC-10. The level 3 books are a strong preparation for AMC-8 and a partial preparation for AMC-10 and AIME. Level 3 consists of: Word Problems (volume 9), Arithmetic and Number Theory (volume 10), Operations and Algebra (volume 11), Geometry (volume 12), and Combinatorics (volume 13). On the contest list for this level: MATHCOUNTS, Math Kangaroo levels 5-6 and 7-8, MOEMS-M, Purple Comet, AMC-8, AMC-10. The computational complexity makes these problem sets useful for preparing the AIME in the long run.

About Volume 10 - Arithmetic and Number Theory The problem sets reflect the use of the most elementary facts of number theory in challenging ways. Instead of imitating contest problems, we have focused on presenting questions that explore the nuts and bolts used to create problems. This volume is particularly suitable for young students who aim to do well on AIME in later years and have the patience to explore the elementary facts of number theory in depth. We continue in level 4 with more advanced number theory. Fluency with order of operations and the ability to handle simple algebraic expressions are pre-requisites.

From reader reviews:

Emma Latshaw:

Typically the book Practice Arithmetic and Number Theory: Level 3 (ages 11-13) (Competitive Mathematics for Gifted Students) (Volume 10) has a lot of information on it. So when you check out this book you can get a lot of benefit. The book was compiled by the very famous author. Tom makes some research prior to write this book. This particular book very easy to read you can find the point easily after perusing this book.

Stephen Wilson:

Do you have something that suits you such as book? The reserve lovers usually prefer to choose book like comic, limited story and the biggest an example may be novel. Now, why not seeking Practice Arithmetic and Number Theory: Level 3 (ages 11-13) (Competitive Mathematics for Gifted Students) (Volume 10) that give your fun preference will be satisfied through reading this book. Reading addiction all over the world can be said as the means for people to know world much better then how they react toward the world. It can't be explained constantly that reading routine only for the geeky man or woman but for all of you who wants to be success person. So , for all of you who want to start looking at as your good habit, you are able to pick Practice Arithmetic and Number Theory: Level 3 (ages 11-13) (Competitive Mathematics for Gifted Students) (Volume 10) become your current starter.

Camille Wolfe:

In this era which is the greater man or who has ability in doing something more are more special than other. Do you want to become among it? It is just simple approach to have that. What you should do is just spending your time not very much but quite enough to have a look at some books. On the list of books in the top list in your reading list is Practice Arithmetic and Number Theory: Level 3 (ages 11-13) (Competitive Mathematics for Gifted Students) (Volume 10). This book that is certainly qualified as The Hungry Mountains can get you closer in getting precious person. By looking upward and review this reserve you can get many advantages.

Jillian Harrington:

What is your hobby? Have you heard in which question when you got scholars? We believe that that concern was given by teacher on their students. Many kinds of hobby, All people has different hobby. And you also know that little person similar to reading or as reading through become their hobby. You should know that reading is very important and also book as to be the point. Book is important thing to provide you knowledge, except your own teacher or lecturer. You find good news or update in relation to something by book. Amount types of books that can you choose to use be your object. One of them is actually Practice Arithmetic and Number Theory: Level 3 (ages 11-13) (Competitive Mathematics for Gifted Students) (Volume 10).
