Nature's Chemicals: The Natural Products that Shaped Our World Richard Firth

Natural Products (NPs) is the term used to describe the hundreds of thousands of chemical compounds or substances that are continually produced by living organisms (plants and microbes). Hundreds of millions of tons of these chemicals are generated annually, and the trade in just a few of these has dominated human economic activity for thousands of years. Indeed the current world geopolitical map has been shaped by attempts to control the supply of a few of these compounds. Every day of our lives each human spends time and money trying to procure the NPs of their choice. However, despite their overwhelming influence on human culture, they remain poorly understood. Yet a knowledge of NPs can help in our search for new drugs, further the debate about GM manipulation, help us address environmental pollution, and enable a better understanding of drug trafficking. Nature's Chemicals is the first book to describe Natural Products (NPs) in an evolutionary context, distilling the few simple principles that govern the way in which organisms (including humans) have evolved to produce, cope with, or respond to NPs. It neatly synthesizes a widely dispersed literature and provides a general picture of NPs, encompassing evolution, history, ecology, and environmental issues (along with some deeper theory relevant to biochemistry), with the goal of enabling a wider section of the scientific community to fully appreciate the crucial importance of Natural Products to human culture and future survival.

From reader reviews:

Joshua Sigmund:

In this 21st century, people become competitive in every way. By being competitive at this point, people have to do something to make them survive, being in the middle of the actual crowded place and notice by surrounding. One thing that often many people have underestimated it for a while is reading. Sure, by reading a publication your ability to survive increase then having chance to remain than other is high. To suit your needs who want to start reading any book, we give you this Nature's Chemicals: The Natural Products that Shaped Our World book as beginning and daily reading e-book. Why, because this book is more than just a book.

James Brown:

As people who live in often the modest era should be update about what going on or facts even knowledge to make them keep up with the era which is always change and move forward. Some of you maybe will probably update themselves by reading through books. It is a good choice for yourself but the problems coming to you is you don't know what type you should start with. This Nature's Chemicals: The Natural Products that Shaped Our World is our recommendation so you keep up with the world. Why, as this book serves what you want and wish in this era.

Andrew Joy:

The actual book Nature's Chemicals: The Natural Products that Shaped Our World has a lot associated with on it. So when you read this book you can get a lot of profit. The book was authored by the very famous author. Tom makes some research previous to write this book. This specific book very easy to read you will get the point easily after scanning this book.

Mary Adams:

Reading can called brain hangout, why? Because while you are reading a book particularly book entitled Nature's Chemicals: The Natural Products that Shaped Our World the mind will drift away trough every dimension, wandering in each and every aspect that maybe unidentified for but surely will end up your mind friends. Imaging every single word written in a book then become one application form conclusion and explanation this maybe you never get prior to. The Nature's Chemicals: The Natural Products that Shaped Our World giving you another experience more than blown away your brain but also giving you useful details for your better life in this particular era. So now let us demonstrate the relaxing pattern here is your body and mind will probably be pleased when you are finished reading through it, like winning a casino game. Do you want to try this extraordinary wasting spare time activity?
