Essential Mathematics and Statistics for Forensic Science Craig Adam

This text is an accessible, student-friendly introduction to the wide range of mathematical and statistical tools needed by the forensic scientist in the analysis, interpretation and presentation of experimental measurements.

From a basis of high school mathematics, the book develops essential quantitative analysis techniques within the context of a broad range of forensic applications. This clearly structured text focuses on developing core mathematical skills together with an understanding of the calculations associated with the analysis of experimental work, including an emphasis on the use of graphs and the evaluation of uncertainties. Through a broad study of probability and statistics, the reader is led ultimately to the use of Bayesian approaches to the evaluation of evidence within the court. In every section, forensic applications such as ballistics trajectories, post-mortem cooling, aspects of forensic pharmacokinetics, the matching of glass evidence, the formation of bloodstains and the interpretation of DNA profiles are discussed and examples of calculations are worked through. In every chapter there are numerous self-assessment problems to aid student learning.

Its broad scope and forensically focused coverage make this book an essential text for students embarking on any degree course in forensic science or forensic analysis, as well as an invaluable reference for post-graduate students and forensic professionals.

Key features:

- Offers a unique mix of mathematics and statistics topics, specifically tailored to a forensic science undergraduate degree.
- All topics illustrated with examples from the forensic science discipline.
- Written in an accessible, student-friendly way to engage interest and enhance learning and confidence.
- Assumes only a basic high-school level prior mathematical knowledge.

From reader reviews:

Enoch Dutton:

Do you have favorite book? In case you have, what is your favorite's book? Guide is very important thing for us to learn everything in the world. Each book has different aim or goal; it means that guide has different type. Some people feel enjoy to spend their the perfect time to read a book. These are reading whatever they acquire because their hobby is actually reading a book. Think about the person who don't like examining a book? Sometime, man feel need book if they found difficult problem or exercise. Well, probably you'll have this Essential Mathematics and Statistics for Forensic Science.

Roger Patrick:

As people who live in typically the modest era should be up-date about what going on or data even knowledge to make all of them keep up with the era which is always change and advance. Some of you maybe will certainly update themselves by reading books. It is a good choice for yourself but the problems coming to you actually is you don't know which one you should start with. This Essential Mathematics and Statistics for Forensic Science is our recommendation to cause you to keep up with the world. Why, because book serves what you want and need in this era.

Annette Spafford:

The ability that you get from Essential Mathematics and Statistics for Forensic Science is the more deep you searching the information that hide inside the words the more you get enthusiastic about reading it. It doesn't mean that this book is hard to know but Essential Mathematics and Statistics for Forensic Science giving you thrill feeling of reading. The copy writer conveys their point in particular way that can be understood by means of anyone who read the idea because the author of this publication is well-known enough. This specific book also makes your vocabulary increase well. So it is easy to understand then can go along with you, both in printed or e-book style are available. We advise you for having this kind of Essential Mathematics and Statistics for Forensic Science instantly.

Harry Thomas:

Information is provisions for folks to get better life, information today can get by anyone with everywhere. The information can be a knowledge or any news even a huge concern. What people must be consider while those information which is inside former life are difficult to be find than now could be taking seriously which one is appropriate to believe or which one typically the resource are convinced. If you get the unstable resource then you get it as your main information it will have huge disadvantage for you. All of those possibilities will not happen with you if you take Essential Mathematics and Statistics for Forensic Science as your daily resource information.
