Comic Book Math ~ Fun-Schooling Journal: Adding, Writing & Subtracting Games (Ages 6 to 11)

Sarah Janisse Brown

This Fun-Schooling Math and Writing Journal is packed full of fun activities to help children learn! They will practice the skills they need to add, subtract, calculate, use logic, create comics, draw, write, and use their imaginations.

This book is geared toward beginners as well as older children who struggle with basic skills or need to practice their math and writing while having fun. The math is not difficult or confusing. If you have a child who dislikes math, try this to spark a new love for numbers.

Revised and updated April 2016 - NEW "Make Your Own Comic" Activities!

The characters in the book are fun and will remind your child of playing with Legos, robots, Mine-craft, pets, friends!

There are over 100 activities, games, and practice pages in this book to help your child learn. Be sure to spend time teaching your child when he needs help. Some games are designed for TWO people to play together. Almost all the activities are Logic-Based, that means that your child may not need very much help figuring out what to do on each page. The book is best for ages 6 to 11. Many of the games from "The Littlest Math book" are found in this book, but this is a much bigger size.

This book has wide margins and extra white space so your child will have lots of room to draw and doodle while figuring out the math mysteries!

This book is designed to work well for Visual Thinkers and children with ADHD, Asperger's and Dyslexia. It is important for parents and teachers to understand that creative children need white space so they can work out their problems. This book offers a lot more creative freedom than any other math book on the market. The goal is to inspire your child to find joy in numbers, writing, logic, drawing and creativity. While your child delights in this fun method of learning, he or she will be practicing basic math skills.

You may have a children who is older, but never really grasped the meaning behind the math. They might be offended by workbooks that are babyish - but this one is FUN! This book always connects math with meaning so your child can apply mathematics to real life. We want each student to develop strong thinking skills, not just to be able to memorize and repeat facts.

We want each student to love learning and experience the joy of curiosity, discovery and creativity as part of their educational journey.
